

TEC.LOG — Classroom Dataset Standard

Version 1.0 — 2026-05-18

This document defines the **canonical pedagogical dataset** for the Odoo EDU LAB (edu-concorde-logistics-lab.odoo.com) used across all TEC.LOG modules M1–M5.

Dataset Architecture

Product Catalogue

Code	Name	Type	Tracking	Primary Module	Role
SKU-001	Boîte carton standard	Goods	None	M1, M2	Core demo — GR, putaway, picking
SKU-002	Palette bois standard	Goods	None	M2	Demo — internal transfer, heavy item
SKU-003	Film étirable transparent	Goods	Lot	M2, M3	Lot tracking demo, cycle count
SKU-004	Ruban adhésif d’emballage	Goods	Lot	M2, M3	Lot tracking + Min/Max replenishment
SKU-005	Étiquette code-barres	Goods	None	M3, M4	Min/Max replenishment, KPI data
SKU-006	Colle industrielle	Goods	None	M4	KPI data (slow mover)
SKU-007	Sac plastique refermable	Goods	None	M4	KPI data (fast mover)
SKU-008	Intercalaire carton	Goods	None	M4	KPI data
SKU-009	Cerclage plastique	Goods	None	M5	End-to-end flow
SKU-010	Coussin d’air protection	Goods	None	M5	End-to-end flow
BOX-001	BOX-001 (carton assemblé)	Goods	None	M1, M2	GR demo, packaging

Location Structure

```
WH/ (Warehouse: concorde-logistics-lab)
├─ WH/Input          (Réception – dock d'entrée)
├─ WH/Stock          (Stock principal – root)
│   ├─ WH/Stock/Allée-A (Articles lourds / volumétriques)
│   ├─ WH/Stock/Allée-B (Articles lot-trackés)
│   └─ WH/Stock/Allée-C (Articles petits / consommables)
├─ WH/Output          (Expédition – dock de sortie)
└─ WH/Quality Control (Zone contrôle qualité)
```

Putaway Rules (7 rules)

Product	From	To	Module
SKU-001	WH/Input	WH/Stock/Allée-A	M2 demo
SKU-002	WH/Input	WH/Stock/Allée-A	M2 demo
SKU-003	WH/Input	WH/Stock/Allée-B	M2 demo
SKU-004	WH/Input	WH/Stock/Allée-C	M2 demo
SKU-005	WH/Input	WH/Stock/Allée-C	M3 demo
BOX-001	WH/Input	WH/Stock/Allée-A	M2 demo

Lot Structure

Lot	Product	Qty	Module	Purpose
LOT-SKU003-A	SKU-003	50	M2, M3	Lot tracking demo — oldest lot (FIFO)
LOT-SKU003-B	SKU-003	30	M3	Cycle count — partial lot
LOT-SKU003-C	SKU-003	20	M3	Cycle count — smallest lot
LOT-SKU004-2024-A	SKU-004	40	M2, M3	Lot tracking + replenishment trigger
LOT-SKU004-2024-B	SKU-004	25	M3	Lot tracking — second lot

Reorder Rules (Min/Max)

Product	Min	Max	Location	Module	Teaching Point
SKU-003	30	150	WH/Stock	M3	Replenishment trigger at 100 units
SKU-004	10	50	WH/Stock	M3	Replenishment trigger at 65 units
SKU-005	20	100	WH/Stock	M3	Replenishment trigger at 500 units

Module-by-Module Dataset Usage

M1 — Fondamentaux ERP/WMS

Teaching dataset:

- SKU-001 (130 units @ Allée-A) — GR demo, inventory update
- BOX-001 (75 units @ Allée-A) — packaging demo
- WH/IN/00002, WH/IN/00003 (done) — completed receipts for reference

Exam dataset:

- Students receive a fresh PO for SKU-001 (50 units) and must validate GR
- Students must verify stock update in Inventory → Products

Error scenarios:

- Forgetting to validate the receipt (state stays “ready” not “done”)
- Confusing “Save” with “Validate/Post”
- Looking at virtual stock instead of on-hand stock

Odoo Lab URL: `/odoo/inventory/products` → filter by SKU-001

M2 — Exécution d'entrepôt

Teaching dataset:

- SKU-001 @ Allée-A (130 units) — putaway demo
- SKU-002 @ Allée-A (20 units) — internal transfer demo
- SKU-003 @ Allée-B (lots A/B/C) — lot tracking demo
- SKU-004 @ Allée-C (lots 2024-A/B) — lot tracking + putaway
- WH/INT/00001 (draft) — internal transfer to demonstrate

Exam dataset:

- Students receive a receipt for SKU-003 (30 units, new lot LOT-EXAM-001)
- Students must validate receipt, verify putaway to Allée-B, confirm lot creation

Error scenarios:

- Receiving without specifying lot number (lot-tracked product)
- Putaway rule not applied (product received directly to WH/Stock root)
- Internal transfer left in “draft” state

Odoo Lab URL: `/odoo/inventory/picking-type-internal` → WH/INT/00001

M3 — Contrôle des stocks

Teaching dataset:

- SKU-003 @ Allée-B (lots A=50, B=30, C=20) — cycle count demo
- SKU-004 @ Allée-C (lots 2024-A=40, 2024-B=25) — replenishment trigger
- SKU-005 @ Allée-C (500 units) — Min/Max demo
- Reorder rules for SKU-003, SKU-004, SKU-005

Exam dataset:

- Students must perform a cycle count for SKU-003 (adjust LOT-B from 30 to 28)
- Students must trigger replenishment for SKU-004 (current qty=65, min=10 → no trigger needed; reduce to 8 → trigger)

Error scenarios:

- Applying inventory adjustment without selecting the correct lot

- Confusing “Scheduled Date” with “Deadline” in replenishment
- Not confirming the replenishment order

Odoo Lab URL: `/odoo/inventory/reporting/inventory` → filter by SKU-003

M4 — Indicateurs de performance logistique

Teaching dataset:

- All products with stock movements (receipts WH/IN/00002–00006, delivery WH/OUT/00001)
- SKU-001 movement history (receipts + delivery)
- Reorder rules for KPI analysis

Exam dataset:

- Students analyze the KPI dashboard and identify:
 - OTIF rate from WH/OUT/00001
 - Stock accuracy from cycle count adjustments
 - Fill Rate from available stock vs demand

Error scenarios:

- Confusing “Inventory Valuation” with “Stock Moves”
- Reading “Forecasted Quantity” as current stock
- Not filtering by date range for KPI analysis

Odoo Lab URL: `/odoo/inventory/reporting/moves` → filter by product

M5 — Simulation opérationnelle intégrée

Teaching dataset:

- Full end-to-end: PO → GR → Putaway → Picking → Delivery → Cycle Count
- Uses SKU-009, SKU-010 (0 stock — students create from scratch)
- Audit trail: all 10 pickings visible in history

Exam dataset:

- Students execute complete flow for SKU-009 (create PO, validate GR, internal transfer, create SO, validate delivery)
- Students generate audit report

Error scenarios:

- Breaking the PO → GR link (creating GR without PO reference)
- Forgetting to validate each step before proceeding
- Mixing up source documents (origin field)

Odoo Lab URL: `/odoo/inventory` → full dashboard

Classroom Reset Procedure

Before Each Class (Teacher)

1. **TEC.WMS:** Use MonitorDashboard → “Réinitialiser” for each student run
2. **Odoo EDU LAB:** No reset needed — Odoo data is persistent and additive
3. **Stock levels:** Run `odoo_stock_adjust.py` if stock was consumed during previous class

Exam Reset (Teacher)

1. Archive any student-created POs/SOs from previous exam
2. Run stock adjustment script to restore canonical quantities
3. Verify putaway rules are intact
4. Confirm lot quantities match the standard above

Student Self-Reset (TEC.WMS only)

Students can use the “Nouvelle tentative” button in their run report to reset their own TEC.WMS session. Odoo data is NOT reset per student.

Quick Reference Card (for classroom display)

OD00 EDU LAB – STOCK REFERENCE

ALLÉE-A (Articles lourds)

SKU-001	Boîte carton	130 u.
SKU-002	Palette bois	20 u.
BOX-001	Carton assemblé	75 u.

ALLÉE-B (Articles lot-trackés)

SKU-003	Film étirable	100 u. (3 lots: A=50, B=30, C=20)
---------	---------------	-----------------------------------

ALLÉE-C (Consommables / petits articles)

SKU-004	Ruban adhésif	65 u. (2 lots: 2024-A=40, 2024-B=25)
SKU-005	Étiquettes	500 u.

RÈGLES MIN/MAX

SKU-003	: min=30, max=150
SKU-004	: min=10, max=50
SKU-005	: min=20, max=100
